Ralph Waldo Emerson was an American poet, essayist, and philosopher. Born in 1803 in Boston, Massachusetts, Emerson won fame as the leader of the transcendentalist movement. In his early years, the philosopher was invited by Boston's Second Church to serve as a pastor and was later ordained. Unfortunately, after only two years, Emerson's wife died of tuberculosis - this event made him question his thoughts and beliefs. The man who once believed in biblical miracles decided to resign his pastorate. Having found the answers to all those questions following his wife's death, Emerson formulated his philosophy of transcendentalism by anonymously publishing a little book called "Nature". He strongly believed that the individual must have the courage to look into his own heart for spiritual guidance and trust his intuition. Emerson's views suggest that men are capable of generating completely original insights and that the truth can be experienced directly from nature, without any divine help. Emerson's work has greatly influenced other writers and thinkers; his teachings are highly valued in the history of American culture.
